

@MAXX® ID-1

Mobile device for secure transactions, private data handling and storage

Key Hardware features

- 1 Smart card reader
- 2 built-in Flash memory (1 GB)
- 3 LED status indicator

@MAXX® ID-1 benefits

- Convenient , portable secure smart token
- Integrated ID1 contact chip card reader and on board flash memory
- Smart card based secure identification and authentication
- Secure private data processing and storage
- PC/SC compatible drivers Windows(TR) (incl. Win7), MacOS, Linux
- Customization options: Logo, casing colour*

Overview

@MAXX® ID-1 offers on board flash memory, along with smart card based security and functionality.

Plugged into any free USB port, this mobile device offers secure high-performance and cost-efficient handling of sensitive data. The built-in smart card reader and on-board memory makes @MAXX® ID-1 the ideal device for implementing numerous secure applications such as e-Banking, e-Government, web service access.

Due to its compact design the @MAXX® ID1 is ideally suited as a portable device which easily fits into the users pocket or key ring.

Application examples

- Easy deployment of applications stored in on board memory
- Booting into secure environments and secure processing of sensitive data
- Data encryption on hard disk and applications
- Secure log on to PCs, networks and web services
- Secure password and user profile storage and processing
- Digital signing of emails, documents and transactions

Multifunctional Token

The SCM Microsystems' Advantage

Trusted Partner

- ASIC (application specific IC) and smart card reader development experience since 1990
- Innovative solutions - more than 50 patents filed
- Reliable high-quality mass production capability - more than 15 Mio. reader solutions deployed to date
- Active role in standardization committees
- Complex project management expertise e.g. U.S. Department of Defense CAC program, electronic ID applications (ePassport, health card projects, national ID, driver licence)

Support

- Global presence and support
- Product customization options
- Product branding
- Dedicated Research & Development and customer support team
- Strong global partnership network with leading suppliers along the value chain (smart card manufacturers, application providers, system integrators, device manufacturers)

Trusted Products

- Broadest portfolio of security technology products - for governments, corporations, financial institutions, small and medium-sized enterprises and individuals around the globe
- Secure smart chip reader design - certified and compliant to EMV, Common Criteria, PC/SC, USB
- High-quality products designed to meet the various requirements in the data security area
- Flexible and future proof solutions - SCM's SmartOS™ firmware and its own ASIC technology allow in Field upgrades and secure your investment
